Volume 12 Number 1

March 1996

<b>A. Sharon</b>	1	Editorial
<b>S. Chan, M. Munro and A. Fahim</b>	3	Accuracy-speed relationships of a robotic filament winding cell
<b>C. R. Liu and S. Mittal</b>	15	Single-step superfinish hard machining: feasibility and feasible cutting conditions
<b>Z. Shiller, H. Chang and V. Wong</b>	29	The practical implementation of time-optimal control for robotic manipulators
<b>B. Shirinzadeh</b>	41	A CAD-based hierarchical approach to interference detection among fixture modules in a reconfigurable fixturing system
<b>A. N. Poo, K. B. Lim and Y. X. Ma</b>	55	Application of discrete learning control to a robotic manipulator
<b>J. M. Schimmels and S. Huang</b>	65	A passive mechanism that improves robotic positioning through compliance and constraint
<b>R. Boudreau, S. Darenfed and E. Biden</b>	73	Application of time series and polynomial learning networks to robot trajectory error control
<b>C. T. Culbreth, M. Miller and P. O'Grady</b>	81	A concurrent engineering system to support flexible automation in furniture production
<b>J. Scholliers and H. Van Brussel</b>	93	Design and off-line programming of a robotic tape winding cell
<b>M. Prinz, H.-C. Liu, B. O. Nnaji and T. Lueth</b>	99	From CAD-based kinematic modeling to automated robot programming
<b>M. Rybski, M. Shoham and G. Grossman</b>	111	Robotic manipulators based on inflatable structures
	121	Announcements

Volume 12 Number 2

June 1996

<b>P. M. Pelagagge, G. Cardarelli and M. Palumbo</b>	125	Some criteria to help the experimental setup of assembly cells with cooperating robots
<b>M. M. Marefat and L. Wu</b>	135	Purposeful gazing and vergence control for active vision
<b>L. Mangialardi, G. Mantriota and A. Trentadue</b>	157	A three-dimensional criterion for the determination of optimal grip points
<b>H. Zhuang and Z. S. Roth</b>	169	A note on singularities of the MCPC model
<b>L. Ferrarini</b>	173	Hierarchical multi-layer CAD system for systematic design of complex logic controllers

<b>Y. Edan and S. Y. Nof</b>	185	Graphic-based analysis of robot motion economy principles
<b>S. Demey, H. Van Brussel and H. Derache</b>	195	Determining set-ups for mechanical workpieces
	207	Calendar

**Volume 12 Number 3****September 1996**

<b>R. Colbaugh, K. Glass and H. Seraji</b>	209	Adaptive tracking control of manipulators: theory and experiments
<b>J. Zhang, B. Chuah, E. Cheung and Z. Deng</b>	217	Information modeling for manufacturing systems: a case study
<b>G. Cardarelli, P. M. Pelagagge and A. Granito</b>	227	Performance analysis of automated interbay material-handling and storage systems for large Wafer Fab
<b>N. Dhayagude, Z. Gao and F. Mrad</b>	235	Fuzzy logic control of automated screw fastening
<b>J. Howell and R. C. Young</b>	243	Reasoning about correlation-based inspection of small-batch-manufactured objects
<b>J. Xiao and R. A. Volz</b>	251	Constrained accelerated-feedback control for robot motion
<b>T. Furukawa, D. C. Rye, M. W. M. G. Dissanayake and A. J. Barratt</b>	261	Automated polishing of an unknown three-dimensional surface
<b>T.-K. Peng and A. J. C. Trappey</b>	271	CAD-integrated engineering-data-management system for spring design
	283	Erratum
	285	PatentsALERT

**Volume 12 Number 4****December 1996**

<b>W. S. Newman, B. B. Mathewson, Y. Zheng and S. Choi</b>	293	A novel selective-area gripper for layered assembly of laminated objects
<b>E. Dermatas, A. Nearchou and N. Aspragathos</b>	303	Error-back-propagation solution to the inverse kinematic problem of redundant manipulators
<b>M. A. Rodrigues and Y. F. Li</b>	311	Dynamic systems modelling and development of robotic applications in a visual programming environment
<b>M. Gülesin</b>	321	Intermediate part modelling in a process planning and fixturing system
<b>C.-P. Hwang and C.-S. Ho</b>	329	A knowledge-based task-level programming and execution environment for robots
